

Scalability & Future Plan

SmartBridge Skill Wallet Project Roadmap & Analysis

1. Header Information

Date	30 September 2026
Team ID / Project Name	XXXXXX / XXXXXX
Maximum Marks	1 Mark

2. Current System Limitations

S.No	Limitation	Impact	Priority
1	Single-instance server deployment prone to downtime under heavy load	High	High
2	Relational database schema lacking indexing on frequently queried columns	Medium	Medium
3	Manual data backup process with no automated failover	Low	Low

3. Scalability Plan

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports up to 100 concurrent users on a local server	Migrate to a cloud load-balanced architecture using auto-scaling groups
2	Data Storage	Local file system and single SQLite database instance	Transition to managed cloud storage like AWS RDS with object storage for media
3	Performance	Average query response time is ~500ms under minimal load	Implement Redis caching layer for frequent read operations and index database tables
4	Security	Basic session authentication with plain-text passwords	Integrate OAuth 2.0 / JWT token authentication and role-based access control (RBAC)

4. Future Roadmap

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1 (Short-term)	User Dashboard Analytics	1 Month	Improves user engagement metrics visibility
Phase 2 (Long-term)	Mobile Application Integration	3–6 Months	

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
			Expands accessibility to mobile user base
