

Date: 29.09.2026

Team ID: Your Team ID

Project Name: LegalEase

Maximum Marks: 5 Marks

Solution Summary

Field	Details
Repository Link / URL	Paste your GitHub / GitLab repository link
Programming Language(s)	Python, JavaScript, HTML, CSS
Framework(s) Used	Flask / React (<i>use only the one you actually used</i>)
Key Features Implemented	Legal document upload and processing; lease data extraction; document classification; clause identification; legal document generation; search and retrieval of document information
Pending / Incomplete Features	Advanced document analysis, additional legal document templates, and further testing (<i>if applicable</i>)
Setup / Run Instructions	Install required dependencies → configure the application → run the backend/server → open the LegalEase application in a browser

Short version for the form

Programming Languages:

Python, JavaScript, HTML, CSS

Framework:

Flask

Key Features:

- Legal document upload and processing
- Lease information extraction
- Clause identification
- Document classification
- Legal document generation
- Search and retrieval

Pending Features:

Additional document templates and advanced analysis.

Setup:

Install dependencies, configure the project, run the application, and open it in the browser.

Important: If your actual LegalEase project uses **Salesforce + LegalEase** rather than Flask/React, tell me the technologies you used, and I can fill this form exactly according to your project.
