

LEGALEASE AI - CUSTOMER JOURNEY MAP

Scenario: Creating, reviewing, editing, and exporting an AI-generated legal document

SCENARIO User needs a professional legal document without extensive legal drafting knowledge

STEPS	ENTICE Discover LegalEase	ENTER Start document	ENGAGE Generate & review	EDIT Customize	EXIT Export / finish	EXTEND After document
What happens?						
INTERACTIONS Interactions	Website / web app landing page	Forms, dropdowns, text areas, date field	Generate button and AI response	Editable preview and edit controls	Download buttons or print to PDF	Document history / new document flow
THINGS / TOUCHPOINTS	Browser, laptop or mobile device	Document type, party and terms fields	AI-generated text, preview screen	Text editor, formatting controls	TXT file, Word file, PDF file	Saved document / new project
GOALS & MOTIVATIONS	Help me understand what LegalEase can do	Help me provide my requirements easily	Help me create a useful first draft	Help me make the document fit my needs	Help me obtain a usable document	Help me reuse or improve my work
POSITIVE MOMENTS	Simple concept and clear purpose	Easy structured input	Fast AI-generated content	Freedom to change the wording	Multiple export formats	Can return for future documents
NEGATIVE MOMENTS	Unclear whether the service fits the need	Too many or unclear fields	AI output may need review or correction	Editing can be time-consuming	Formatting may need final checking	No legal history or advanced analysis yet
AREAS OF OPPORTUNITY	Show examples and supported documents	Use smart defaults, examples and hints	Add clause suggestions and validation	Improve rich text editing and comparison	One-click branded DOCX / PDF export	Add history, templates, multilingual support

KEY INSIGHT Make each stage simple, transparent, editable, and confidence-building while keeping the user in control. LegalEase can support generation, preview, editing, and export as described in the project specification.
